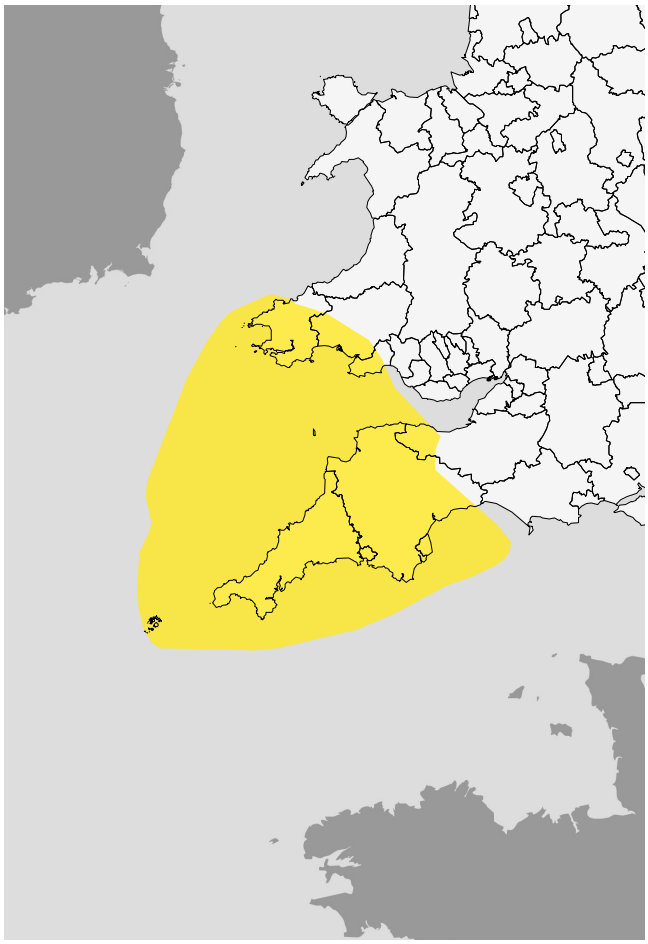
Yellow warning
Thunderstorm

Between
05:00 Wed 2 Jun 2021 and
11:00 Wed 2 Jun 2021



Thunderstorms likely across parts of southwest England and southwest Wales on Wednesday morning

What to expect

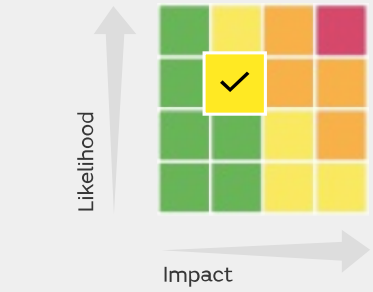
- Some short term loss of power and other services is likely
- There is a good chance driving conditions will be affected by spray, standing water and/or hail, leading to longer journey times by car and bus
- Probably some damage to a few buildings and structures from lightning strikes
- Delays to train services are possible
- Some flooding of a few homes and businesses is possible, perhaps leading to some damage to buildings or structures

Further details

An area of thunderstorms will move northwards into southwestern parts of the UK on Wednesday morning.

Lightning is likely to be the main hazard from this though some heavy rain and hail is possible, with perhaps 15-20 mm of rain in a short period for some spots.

The nature of thunderstorms is that many areas will see little or no rain and miss the lightning but where they do occur the increased numbers of people makes disruption more likely.



Medium likelihood of low impacts

Issued at 11:33 Tue 1 Jun, 2021
